

**Universität Stuttgart**

Institut für Flugmechanik und Flugregelung

# Aerospace Guidance, Control, and Dynamics Researcher / Lecturer

The Institute of Flight Mechanics and Controls (iFR)  
is looking for a researcher/lecturer (salary according to TV-L E14,  
full time) with a start date ideally in Q2/2024. The position is permanent.

## Your duties include

- Organization, coordination and management of the institute's teaching.
- Teaching (9 hours/week/semester). This includes lectures, seminars, and supervision of student theses.
- Research of theoretical and practical nature according to your own interests. These activities should be aligned with the research topics of the institute.
- Publishing results at scientific conferences and in journals.

## Requirements

- PhD (or Dr. degree) in engineering, preferably in the field of aerospace guidance, control, and dynamics or a related field.
- Experience in teaching
- English language working proficiency (oral and written)

The iFR is committed to increasing the number of women employed in scientific positions. Severely disabled persons are given priority if equally qualified.

Please address your full application (cover letter, CV, certificates and transcripts) including a brief research and teaching statement to:
